

# Andra Radioactive Waste Disposal Sites

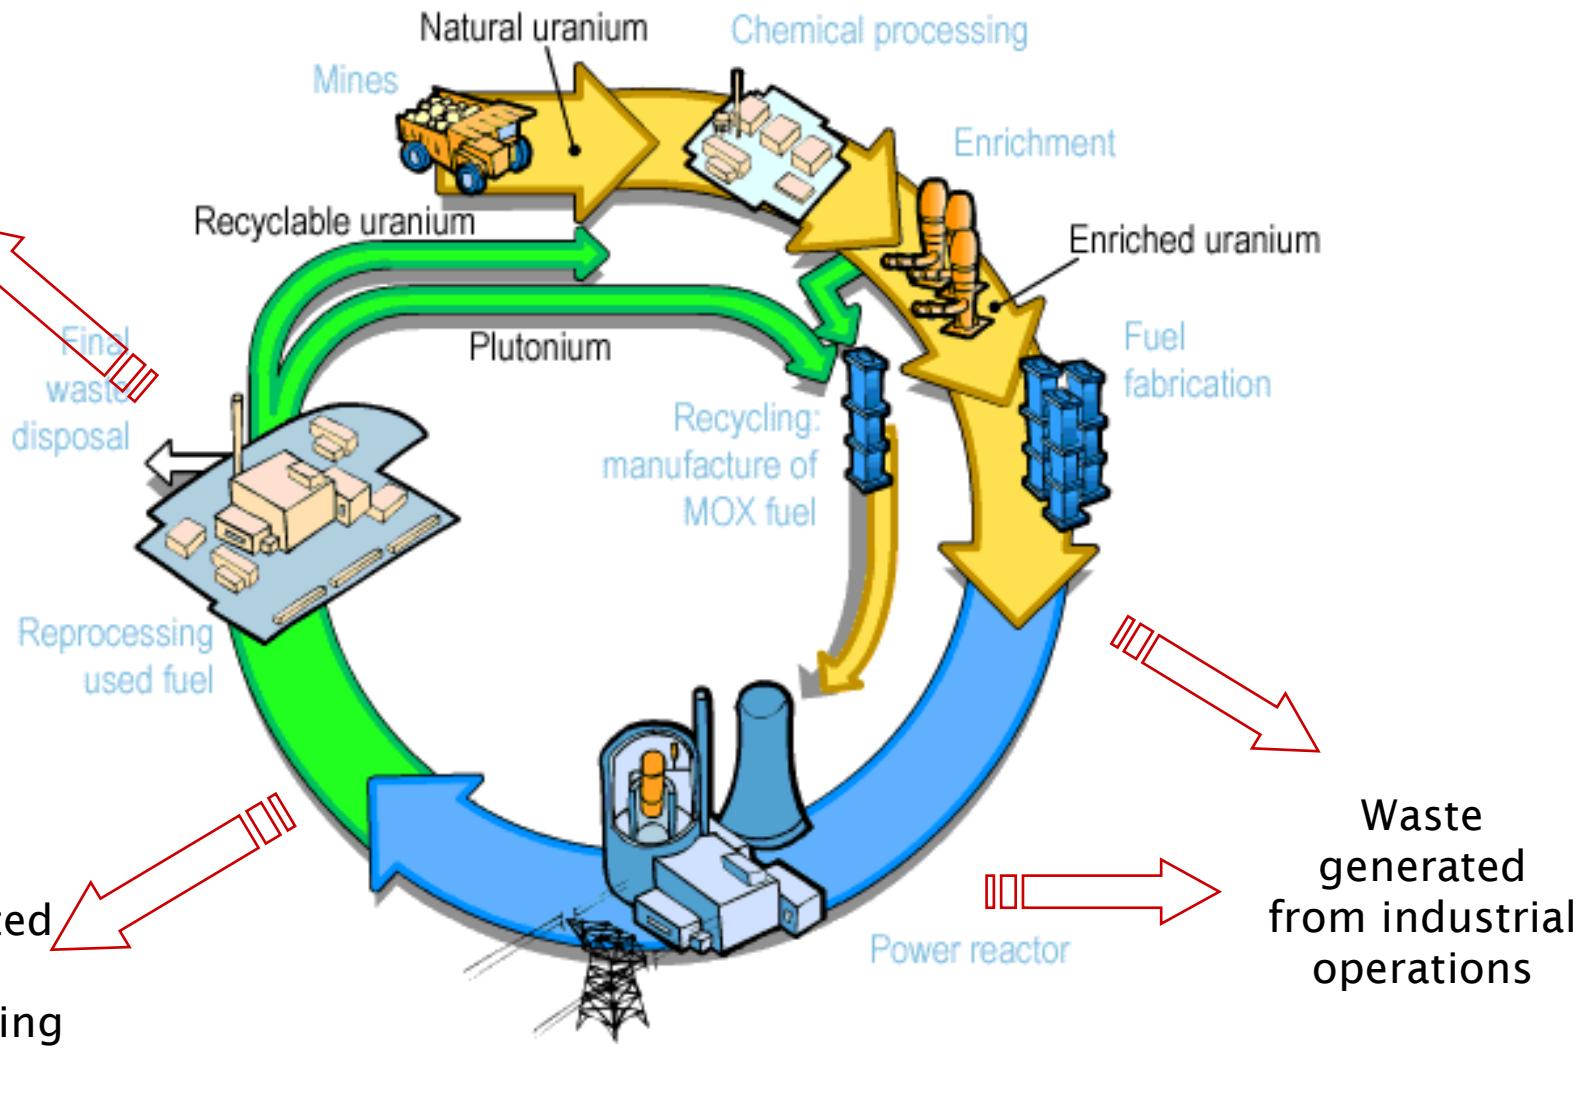

Dr Gérald OUZOUNIAN

ANDRA, Director

International Seminar  
Nuclear Decommissioning: an opportunity for Global and  
sustainable development  
Sogin – Milano, 12 december 2014

# The nuclear fuel cycle

Waste generated from fuel processing

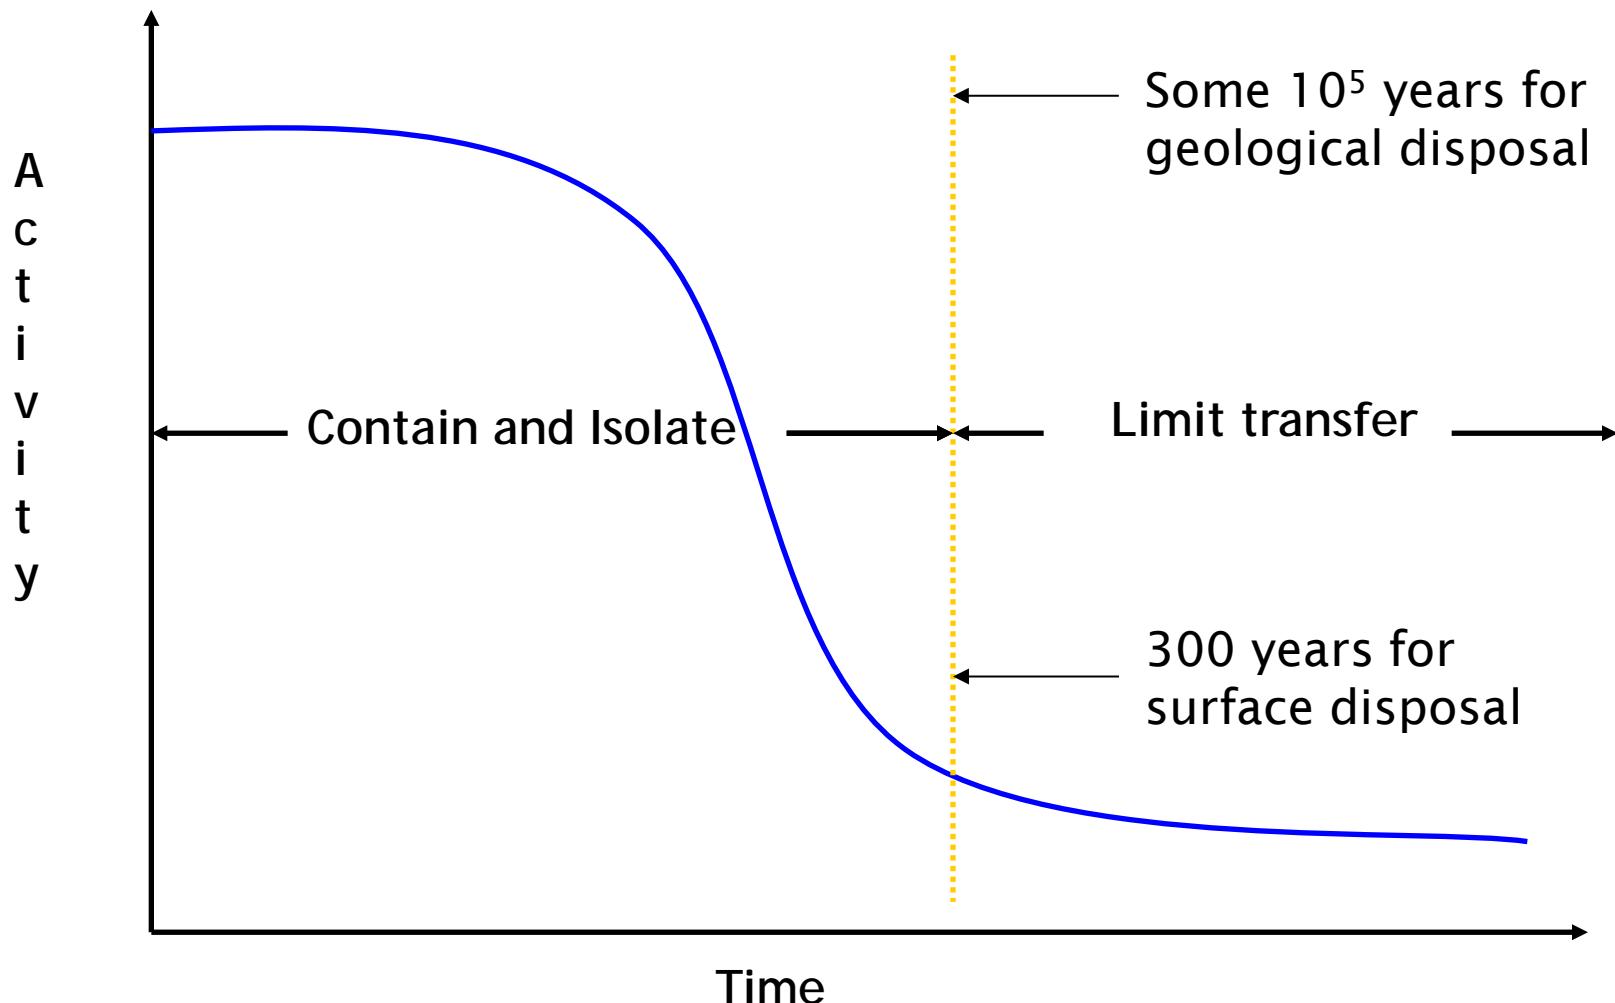

# The French classification

		<b>Short-lived waste</b> Period ≤ 31 years	<b>Long-lived waste</b> Period > 31 years
		Recycling or disposal of waste from dismantling operations (CSTFA in France since 2003)	Graphite, radium-bearing waste (Studies stage in France)
Very low level	Low level	Waste mainly from day-to-day operation of NPPs (CSFMA in France since 1992)	
Intermediate level	High level		Waste from SF reprocessing plants (Geological disposal facility in France to be commissioned in 2025) HL vitrified waste : after reprocessing & cooling,

## A common concern

- Protection of human beings and the environment
  
- Immediate and long term protection

# Strategy for management

## Radioactive Waste National Inventory

Last Edition published in July 2012

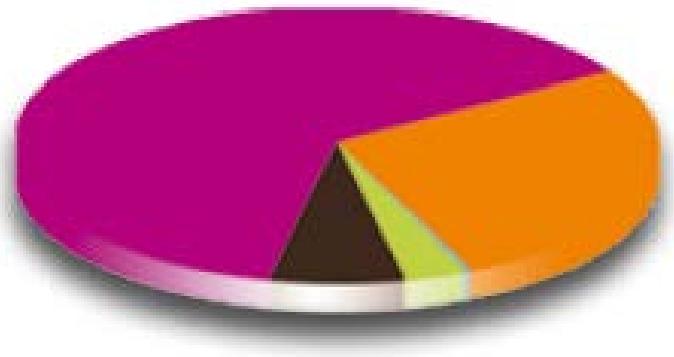

Waste volume (m <sup>3</sup> )	Waste at end- 2010	Forecast end- 2020	Forecast end- 2030
HLW	2,700	4,000	5,400
ILW-LL	41,000	45,000	49,000
LLW-LL	87,000	89,000	133,000
LILW-SL	830,000	1,000,000	1,200,000
VLLW	360,000	750,000	1,300,000
<b>Total</b>	<b>~1,320,000</b>	<b>~1,900,000</b>	<b>~2,700,000</b>

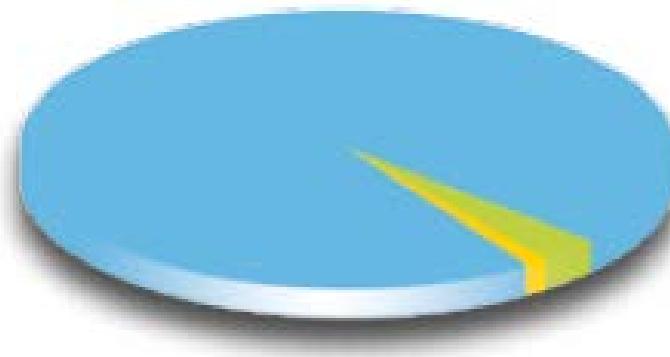

# National Inventory of Radioactive Materials and Waste

## 2012 Edition

*Distribution of the volume*

*Distribution of the level of activity*

HL	0,2 %
IL-LL	3,1 %
LL-LL	6,6 %
LIL-SL	62,8 %
VLL	27,3 %

## Conclusion

- Inventory of radioactive waste and management plan
- A disposal solution suited to the level of risk linked to each type of waste
- Disposal solutions exist for all types of waste, are already operated or being commissioned
- A strong policy and approach on communication, integration and dialogue to support the development of its disposal facilities was developed by Andra
- But overall, general support is needed at the right level
